PartsPeople began as a small company 17 years ago in an extra bedroom of my house. I had saved a small sum of money to purchase some computer parts and began selling them on eBay. After a few months I realized that people needed a place to go for Dell parts so I began building our website. Since we are located in Austin, Texas, where Dell.com was founded, I was able to set up a solid supply line with Dell. From the start, we focused on customer satisfaction and selling quality parts. We have grown a lot since 2002 but still and always the customer will come first. You will find that we go above and beyond with every order and offer free resources and support before and after the sale. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. David E. Pierri 5.0 out of 5 stars Also found out why these hinges failed, the bottom screws came out!Nice, right Well I thought so until I opened up my existing cover and noticed that the prewired replacement seemed to be missing four little circuit boards.

<http://eco-region31.ru/02-polaris-scrambler-500-manual>

I didnt do very much research, but examination revealed that there are alternative setups I think relating to wireless and bluetooth but Im just intelligently guessing; this lid comes prewired for an FM6 setup, and although Im not sure what it refers to, I am sure that mine is an FM7. That being said, I spent approximately an extra hour taking out the tiny screws and carefully removing the metal tape in order to transfer all of the old parts to the new lid and it seems to have worked without any problems. Now, I dont know if you can buy the FM7 configuration anywhere or not, but if you are just replacing the cover for vanity reasons, I would recommend popping the bezel off a little

before ordering to see if you have the small circuit boards surrounding the screen. If so, I probably wouldn't suggest undertaking this task just to change the color of your cover. If anybody knows what those boards are for, I would be interested to know. Easy to replace on my own I am an IT person been building pcs for years and this was an easy fix for a still good laptop dell 1537. I was delivered in good time very pleased. Now if only i could get it back from my mom LOL It bent the hinged beyond fixing and this was the replacement for the back cover. It came quickly and was the perfect fit and color. Great price and great communication from seller. Now if the daughter would hurry up and graduate. Great part for anyone who has a broken power switch on their Dell studio 1535. Got it on time and replaced it myself. Product was like new, no scratches or blemishes. With service manual from Dell, replacement of the back cover took about 2.5 hours. It is well worth it, since the replacement at a service store would have cost 6 times the part cost. I inserted the monitor, reattached the cables for the power and wifi and it worked great. I also like the finish on it, it has a matte black with a rugged feel to it. Take a moment and do a search below or start from our homepage.
